**OMP MECHTRON SPA** has acknowledged its responsibility as an ever-growing Global Company and committed to the implementation of the principles here stated, concerning the Quality of the products delivered, the protection and preservation of the Environment, the Health and the Safety of all its Employees, Contractors and Customers.

**OMP MECHTRON SPA** considers these principles as a strategic tool to exceed Customers' expectations and comply with all applicable rules and regulations at once, to be pursued through the involvement of all its Employees, in each location in which it operates.

### **QUALITY POLICY**

recognizes itself in the development of forefront technologies and continuous processes improvement in order to comply with all applicable rules and regulations, meet and anticipate Industrial Standards and Customer's requirements, delivering products on time and at a fair market price, thus honoring the commitments made.

### **ENVIRONMENTAL, HEALTH AND SAFETY POLICY**

is carried out applying the following principles:

- To comply with all applicable Rules and Regulations and periodically review objectives, practices and procedures in order to improve EHS performances;
- To develop technologies and production processes which allow a rational usage of energy sources, not-renewable resources and raw materials;
- To develop products that can be serviced and disposed safely thus minimizing the production of waste and the environmental impacts on soil, water and air;
- To provide Employees with safe working conditions and appropriate training to support them in performing their tasks in an healthy, safe and environmental conscious manner.

The above mentioned policies are regularly reviewed and updated and spread to all Employees and Stakeholders.

**Andrea Conte**  
Chief Executive Officer
